SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/07/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	10/604,818	CHANG, YI-CHEN	
	<b>Examiner</b>	<b>Art Unit</b>	
	Michael Pervan	2629	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 04 January 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1 and 2 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 and 2 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koyama (US 2003/0030382) in view of Komiya (US 6,924,602).

In regards to claim 1, Koyama (Figure 2A) discloses a method for driving a current-driven Active Matrix Organic Light Emitting Diode (AMOLED) comprising, updating a current value of a current source (the current is input from source line 1201) to charge a capacitor (1207) of the AMOLED pixel (paragraph 100; a current flows through transistor 1205 causing a voltage to be input and stored on capacitor 1207, therefore a current source is charging a capacitor), turning on a charging path used by the current source to charge the capacitor of the AMOLED pixel (paragraph 100; transistors 1203 and 1204 are turned on and current flows through transistors 1205; then a voltage is input and stored on capacitor 1207, therefore a charging path is turned on), complete the charging of the capacitor (paragraph 100, lines 8-11; voltage is input to capacitor 1207, therefore a voltage is stored and the charge is complete) and cutting off the charging path used by the current source to charge the capacitor of the AMOLED pixel (paragraph 100, lines 14-28; transistors 1203 and 1204 and the current flow stops and transistor 1205 turns off, therefore a charging path is turned off).

Koyama does not disclose an initial stage of the turning on of the charging path used by the current source to charge the capacitor of the AMOLED pixel, providing a pre-charging signal to the current source to have the capacitor discharged.

Komiya discloses an initial stage of the turning on of the charging path used by the current source to charge the capacitor of the AMOLED pixel (col. 3, line 66-col. 4, line 36), providing a pre-charging signal to the current source to have the capacitor discharged (col. 3, line 66-col. 4, line 36).

It would have been obvious at the time of invention to modify Koyama to incorporate the teachings of Komiya, an initial stage of the turning on of the charging path used by the current source to charge the capacitor of the AMOLED pixel, providing a pre-charging signal to the current source to have the capacitor discharged, because it prevents the generation of an afterimage (col. 2, lines 17-19).

In regards to claim 2, Koyoma does not disclose a pre-charging signal that makes the capacitor to discharge to a pre-determined level.

Komiya discloses a pre-charging signal that makes the capacitor to discharge to a pre-determined level (col. 3, line 66-col. 4, line 36).

It would have been obvious at the time of invention to modify Koyama to incorporate the teachings of Komiya, a pre-charging signal that makes the capacitor to discharge to a pre-determined level, because it prevents the generation of an afterimage (col. 2, lines 17-19).

***Response to Arguments***

Art Unit: 2629

3. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art (Li, US 6,756,741 and Yumoto, US 6,859,193) are deemed relevant since they disclose updating a current value of a current source, turning on a charging path used by the current source to charge a capacitor of the AMOLED pixel, completing the charging of the capacitor and cutting off the charging path used by the current source to charge the capacitor of the AMOLED pixel.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pervan whose telephone number is (571) 272-0910. The examiner can normally be reached on Monday - Friday between 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amr Awad can be reached on (571) 272-7764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
